

UCLA Energy Forum

Speaker Series

Introducing.....

... a forum for students from business, law, public policy, environment, and engineering with an interest in sustainable energy to network and participate in active discussions with leaders in the industry

Sustainable Energy Business Opportunities & Challenges

The event will review the current landscape of business opportunities and related challenges in sustainable energy. A panel representing various perspectives will present specific case study examples to show how more commercially viable technology and public policy are influencing investments in sustainable energy.

When: January 11th, 2006

Where: A201, Collins Center Anderson School

Time: 6:30 Welcome reception

7:00-9:00 Speakers and Discussion

Dress: Business Casual
