

I am a second year PhD student in the Molecular Biology Institute at UCLA, developing immune based therapies for cancer. It is truly amazing how much the Moving Forward slate has accomplished within the last couple of years: KREC gym, numerous Grad bars, wine tastings, professional development events, housing availability, and the sense of community. I would be humbled to continue building on this mission and work with the UCLA graduate community as well as program officials to address specific moments of graduate education.

Platform:

- Identify and decrease non-critical program fees
- Start conversations for affordable student housing opportunities, while working on a long-term strategy
- Organize diverse variety of frequent social networking events
